

Table. Research questions on literature review.

#	Research question	Motivation
1	Is there a consensus on the use of GORE with the specification of agile functional requirements?	Identify whether there is a formalism/consensus of method, representation, or validation in the use of the subject of study in the agile requirements.
2	What domains are used to illustrate the application of the topic of interest and what results were achieved?	Visualize the areas of knowledge or fields that have benefited from the projects where GORE has been applied.
3	What results were achieved?	Identify in the literature the generation of models for the interpretation of requirements and requirements documents based on models.
4	What research topics can be identified from the selected studies?	Research topics identified in the implementation of GORE approaches.
5	What GORE solutions are used and what is the trend in the last decade?	Identify the domains where GORE concepts can be applied, and therefore, diversify the context of their use.
